**To attend your group remotely :** All you need is decent broadband and a laptop

You'll need an upload speed of at least one Mbs and a laptop. In the classroom, your face will be life-size on a big Ipad, which you can turn around remotely to see and talk to the others. Or you can view directly the electronic board to follow what the teacher is writing there. We'll email you the details. The general opinion : a very satisfying experience all-round, for both groups and private lessons.
